Franciacorta terroir : history and passion for wine

The cultivation of vines has ancient origins on the hills of Franciacorta, as evidenced by the findings of prehistoric grape seed and the writings of classical authors such as Pliny, Columella and Virgil.

Rich archaeological material dating from prehistoric times, such as the remains of stilt house foundations found in the bogs of Sebino, reveal how primitive populations settled here and gradually took over from the Cenomani Gauls, the Romans and the Lombards.

Vine cultivation has been a constant in Franciacorta, where grapes were grown from Roman times to late antiquity and the Middle Ages, thanks to its favourable climatic and soil conditions.

Enjoy the food and wine of the area is the time to complete the quality of a holiday, whether short or long.

Each area of our country offers wines and typical foods that vary further according to the seasons, also the location in the hills gives equal access to agricultural products of the plain to the south and the mountain behind us.

There really is something for everyone. Our aim is to allow guests to get to know some of the most representative producers, both of wine and other specialties and taste together their products.

According to the established program, there will be a tasting dinner with pairings designed together with producers and restaurateurs to share with guests a complete proposal.

Lake Iseo and Franciacorta

The perfect harmony hides in the morainic basin overlooking Lake Iseo.

It was a certain Doctor Conforti, who in 1500, defined the wines of this area as biting.

In June of 2016, the artist Christo brought his visionary concept to the lake, transforming the territory with The Floating Piers, an installation that brought millions to the small area.

When the event came to an end, the stunning landscapes and the wines they produce remained, such as the Franciacorta cultivated along the slightly inclined terraces.
